26 G Galvanized Grade E Hard Steel

SMOOTH OPERATION

The corrugated sheet fits plumb into the drum for a tight fit on the barrel, securing the sheet for better overall alignment

SOUND CONTROL

Tighter barrel alignment on both self-storage and commercial drums plus felt strips adhered around the barrel and down the sheet (self-storage) eliminate metal-on-metal friction to reduce noise

AESTHETICALLY PLEASING

Complete, full-color coverage of the axle and barrel matches the corrugated sheet for a seamless look when the door is closed

These color samples are as close as possible to actual colors offered, within the limitations of color reproduction
